SUMMARY

A fresh graduate in the business field with a strong foundation in the IT industry, particularly in programming. I have one year of hands-on experience working as both a Website Developer and a Helpdesk Technician, where I supported system maintenance, troubleshoot technical issues, and helped design practical solutions for daily operations. I am detail person ab willing to learn new things, and comfortable working with both technical tasks and documentation.

WORK EXPERIENCE

Web developer at Newstyledirect

June 2024 - Present

- Built and improved WordPress eCommerce websites so they load in under 2 seconds and work better on mobile, increasing sales by 20%.
- Created a custom WordPress plugin and used it on more than 5 company websites to make updates faster using GitHub.
- Added spam and fraud protection to reduce fake orders by 80% and improve customer trust.
- Connected sales data with partners like Shippit and QuickBooks, saving more than 5 hours of work each week and helping with marketing decisions.

CAREER OBJECTIVE

I have graduated with a bachelor's degree in business and I am changing my career to the IT industry. I want to learn software development from real work experience, improve my technical skills, and understand how technology solves business problems. My goal is to grow step by step and build a long- term career in IT.
